2. UNDERGRADUATE

2A. Undergraduate Courses Taught

1. **NURS3300. Development of Self as a Nurse: Research and Inquiry**

This course introduces students to nursing and health research and evidence informed practice. Students examine qualitative and quantitative research designs and methods used in nursing and healthcare knowledge development and are introduced to models of evidence-informed practice. Students learn to critique research in order to determine the applicability and usefulness of research findings to the provision of high-quality nursing and health care.

Lead teacher Winter 2008 for 3 sections & Fall 2009 for 10 sections of NURS3300.

Responsibilities included developing the course syllabus and exams, providing all class lectures and power points, and mentoring new course directors/teachers in administrative, curriculum, and student issues.

Fall 2009: Course director for 44 students.

Fall 2008: Course director for 42 students.

Winter 2008: Course director for 42 students.

Fall 2007: Course director for 73 students.

2. **NURS 3515. Evidence-informed Nursing Practice: Research and Inquiry**

This course introduces students to nursing and health research and evidence informed practice. Students examine qualitative and quantitative research designs and methods used in nursing and healthcare knowledge development and are introduced to models of evidence-informed practice. Students learn to critique research in order to determine the applicability and usefulness of research findings to the provision of high-quality nursing and health care.

Fall 2011: Course director for 150 students.

Fall 2013:	Course director for 217 students.
Fall 2015:	Course director for 105 students.
Fall 2016:	Course director for 105 students.
Fall 2018:	Course director for 106 students.
Fall 2022:	Course director for 111 students.

3. NURS 3600. Patterns in the Health Experience of Older Persons

This course explores stories, theories and practices related to the health experiences of older persons. Students will construct their understanding of geriatric nursing praxis through exposure to discussion and theory, by exploring their own experience of the older adult population in the Canadian health care system.

Fall 2017:	Course director for 50 students.
Winer 2019:	Course director for 47 students.

2B. Undergraduate Courses Co-Developed

1. HH/NURS 3000 Trends and Contemporary issues for the Aging Adult in Canada

This course examines current major issues in gerontology using a life span perspective focusing on the needs and concerns along the continuum of persons' lives in various environments. Students will explore and discuss current trends and issues relating to the aging adult in Canada, their own perceptions of aging, and how their personal experiences and societal attitudes have influenced these perceptions.

2C. Externally Taught Courses

1. NUR1057 Interventions to Enhance Health, Abilities and Well-being of Elders

Developed & taught 3-hour lecture "Use of the theory driven approach to interventions research". Faculty of Nursing, University of Toronto, Summer 2004, 2005, & 2006

Summer 2006:	Course director for 7 students.
Summer 2005:	Course director for 7 students.
Summer 2004:	Course director for 6 students.

2. Care of the Elderly

Taught one semester course in Gerontology Certificate Program at College Marie-Victorin, Fall 1992 semester, Montreal, Quebec

3. Nursing Practice 1

Sessional instructor, Winter 2004 semester, Continuing Education, School of Nursing, Ryerson University, Toronto

3. GRADUATE

3A. Graduate Courses Taught

1. HH/NURS 5300 Quantitative Research Methods in Nursing Science

This online course focuses on the acquisition and the application of fundamental concepts, methods, and procedures of quantitative nursing research required to develop a research proposal; including but not limited to: developing researchable questions, designing research, and selecting appropriate methods and analyses.

Winter 2014: Course director for 13 students.

Winter 2015: Course director for 14 students.

Fall 2015: Course director for 15 students.

Winter 2016: Course director for 14 students.

Winter 2017: Course director for 25 students.

Fall 2017: Course director for 14 students.

Winter 2023: Course director for 15 students.

Fall 2023: Course director for 15 students.

2. **HH/NURS 5880 3.0 Practice-Based Research Proposal**

Practice-Based Research Proposal is a non-credit non-elective course for Nurse Practitioner Master students. The course provides students with an opportunity to integrate learning throughout the program. Students undertake a critical and analytic reflection on a topic/issue/problem related to their practicum experience in NURS 5870 6.0 Integrative Practicum. The final Practice-Based Research Proposal represents the synthesis of learning from core MScN courses and core Primary Health Care Nurse Practitioner courses through the development of a research proposal. Students are supervised in the preparation of a research proposal which includes a critical review of the literature, development of a theoretical perspective, and a section on proposed design and methodology.

Summer 2010: Course director for 13 students.

Summer 2014: Course director for 15 students.

Summer 2017: Course director for 15 students.

Summer 2018: Course director for 7 students.

Summer 2023: Course director for 8 students.

Summer 2024: Course director for 7 students.

3. **HH/NURS 6300 Expressions of Nursing Scholarship Colloquium***

This is a required non-credit online course in which graduate students have the opportunity to discuss their progress in their Major Research Project or Thesis.

Summer 2009 – Fall 2011: Masters thesis supervision for 1 student.

Fall 2014 – Fall 2016: Masters thesis supervision for 1 student.

Winter 2015 – Summer 2018: Masters thesis supervision for 1 student.

Fall 2016 – Summer 2019: Masters thesis supervision for 1 student.

Fall 2018 – Summer 2019: Masters thesis supervision for 1 student.

4. **HH/NURS 7030 Systematic Reviews of Healthcare Interventions**

Synthesized evidence is increasingly recognized as the basis for clinical, administrative, and policy in nursing and other disciplines. A systematic review is a method used to

* Course facilitator for two weeks every year from 2009-2016

identify, select, synthesize, and appraise primary research studies in order to answer specific research questions. In this course, students will develop the ability to understand and critique systematic reviews of evidence derived from intervention research, and perform a future review.

Fall 2023:

Course director for 9 students.

2. **HH/NURS 7035 Models of Care in Addressing the Needs of an Aging Population with Complex Health Care Needs**

Older adults' hospital admissions are associated with poor health, functional and discharge outcomes. This course explores models of care that have been designed to improve health, functional and discharge outcomes for older adults with complex health care needs.

3C. Guest Lecturer

2011	Guest Lecturer, Seminar Series, Topic: Usefulness of the response tree format in surveys: Comparison of younger and older adults, Institute for Life Course & Aging, University of Toronto
June 2004	Guest Lecturer, First and second year PhD student seminar course, Topic: Conducting a concept analysis, Faculty of Nursing, University of Toronto
May 2004 – 2006	Guest Lecturer, NUR 1200 Interventions to Enhance the Well-Being of Elders, Topic: Use of the theory driven approach to intervention results, Faculty of Nursing, University of Toronto

3D. Teaching Assistant

Jan – May 1994	Teaching Assistant, Course: Health Care Evaluation, School of Nursing, McGill University

2. COMMUNITY SERVICE, ENGAGEMENT, AND LEADERSHIP

- 2014 – 2018 Lead, Community Engagement
Activity: A research-based community outreach activities were developed by Fox and trainees and held three times at York's 'Science Rendezvous' annual science fair. More than 1000 youth and their parents were engaged in an interactive learning booth that invited them to reflect on their knowledge and assumptions about aging, and consider how media such as cartoons, magazines, and birthday cards portray aging. The learning booth included empathy-building simulations that allowed young people and their families to experience some of the physiological and sensory changes associated with aging.
- 2014 – 2018 Lead, Community Engagement
Activity: Based on findings of a funded project, Fox and trainees developed and held two York-TD Community Engagement Centre Outreach – Ageism workshops. The workshops incorporated empathy-building simulations and introduced youth to the physiological and social aspects of aging, with a particular emphasis on raising critical awareness around the negative effects of ageism in society. Over 100 youth attended and were provided the opportunity to challenge myths and stereotypes about older people, discover cross-cultural perspectives on aging, and learn about ageism's costs to society.
- 2011 – 2012 Lead, Community Engagement
Activity: This Knowledge Exchange activity brought together researchers and knowledge users responsible for policy, program and practice development in acute and community healthcare services for older adults. Fox and trainees held a series of meetings with national decision-makers (policy makers and advisors, administrators, directors) and clinicians (nurses and physiotherapists) and international researchers to identify research priorities. Several priorities were

identified in response to knowledge users' information needs. A document synthesizing stakeholders' knowledge needs and a map outlining future related research initiatives were developed. Research and decision maker partnerships were established. Teams were formed to begin work on the research priorities. The document evolving from the activities formed the basis for my program of research.
